Tutorial 3 Exercises

1. Write a SQL query that can retrieve the following data from the nasa2 database:

projectname	missionno	astrono	role
Apollo	1	10	Lunar Module Pilot
Apollo	7	14	Lunar Module Pilot
Apollo	8	2	Lunar Module Pilot
Apollo	9	35	Lunar Module Pilot
Apollo	10	9	Lunar Module Pilot
Apollo	11	1	Lunar Module Pilot
Apollo	12	4	Lunar Module Pilot
Apollo	13	23	Lunar Module Pilot
Apollo	14	30	Lunar Module Pilot
Apollo	15	43	Lunar Module Pilot
Apollo	16	15	Lunar Module Pilot
Apollo	17	34	Lunar Module Pilot

(12 rows)

2. Produce the below result using a NATURAL JOIN

projectname	missionno	missiontype	crafttype
Mercury	1	SO	capsule
Mercury	2	SO	capsule
Mercury	3	EO	capsule
Mercury	4	EO	capsule
Mercury	5	EO	capsule
Mercury	6	EO	capsule
Gemini	3	EO	capsule

(7 rows)

3. Rewrite the query in point (2) with a CROSS PRODUCT

4. Produce the below result

Hint: You might have to compute the values for one of the output columns
Hint2: The death year might be NULL if the astronaut is still alive, you might want to exclude them from the output

astroname	agedeath
Anderson, Michael P.	44
Artyukhin, Yuri	68

(2 rows)

5. Retrieve the list of astronauts with the name Edward from nasa2 database. You should get:

Hint: pay attention to the capital letter.

astroname
Gibson, Edward
White, Edward
Fincke, Edward
Lu, Edward

(4 rows)

6. Complete Wk 4 Activity 1 you can find on Canvas, if you have not completed it yet

(Activity Sample paper for 1st SQLexam (3).docx) The solutions for these queries are included in the docx file.

Solutions:

Proposed solutions for queries 1 - 5 are available on the Google Drive repository.
The proposed solutions for the queries in exercise 6 are available on the linked file on Canvas.

Tutorial 3 - Solutions

1. SELECT * FROM nasa2_assigned WHERE role = 'Lunar Module Pilot';

2. SELECT projectname, missionno, missiontype, crafttype FROM nasa2_mission NATURAL JOIN nasa2_spacecraft WHERE crafttype = 'capsule';

3. SELECT nasa2_mission.projectname, nasa2_mission.missionno, missiontype, crafttype FROM nasa2_mission, nasa2_spacecraft WHERE nasa2_mission.projectname = nasa2_spacecraft.projectname AND nasa2_mission.missionno = nasa2_spacecraft.missionno AND crafttype = 'capsule';

4. SELECT astroname, death - birth AS ageDeath FROM nasa2_astronaut WHERE death IS NOT NULL AND astroname LIKE 'A%';

5. SELECT astroname FROM nasa2_astronaut WHERE astroname LIKE '%, Edward%';

6. The solutions are on the file you downloaded from Canvas.
